8:30 am - 3:30 pm

Mastering the Language of **MATH**

Join Us at The Petroleum Club of Fort Worth

Seminar includes a fabulous buffet lunch & a copy of Joanne's NEW Book

Looking at *Math* Through the Eyes of a *Language Learner*

FOR TOO LONG, math has been viewed as a series of steps, calculations, and procedures. The reality is that for most students, math is a **NEW LANGUAGE!** Learning the language of math helps students become better readers who more fully comprehend the content of challenging math problems. In addition, these newly acquired language skills are transferable to other content areas!

Discover Creative Strategies To Ensure Students

- think creatively and visually about key math terms,
- discuss/debate and write as they master math concepts,
- develop the reading "grit" required to master challenging math assessments.

Plus - Learn fun accommodations for teaching fractions and decoding difficult work problems, that are highly effective for ALL language proficiency levels!

Your Presenter

Joanne Billingsley

is a dynamic presenter and award-winning teacher. She is acclaimed for her expertise in creating interactive, student-centered, language-rich, classrooms that meet the needs of a wide range of students, including ELLs & diverse learners.

Joanne is the president/founder of **Billingsley Education** and the author of:

Making Words REAL-

Proven Strategies for Building Academic Vocabulary FAST (2016)

Who Should Attend:
